

Accelerator

6 • 20 • 2 + SylGro

Accelerator Transplant Liquid is a proprietary liquid phosphorus in our SylGro product line. This product has balanced formulations of available nutrition and SylGro technology to enhance crop performance in one jug. The SylGro technology is designed to mobilize and to activate the GABA shunt in plants. The shunt directly participates in controlling plant physiology and is key in controlling various physiological responses.

Features and Benefits to Applying Accelerator

- Optimized plant nutrition and nutrient uptake characteristics
- Enhanced root development
- Increased tolerance of biotic and abiotic stresses
- Increased crop uniformity
- Improved crop quality

Advantages of Accelerator

- Eliminates plant transplant stresses
- Larger fibrous root systems
- Enables early plant vigour
- Very cost effective
- Mixes well with most fungicides and pesticides
- Available nutrition (i.e. phosphate) for immediate uptake and use

Accelerator Usage Recommendations – Foliar Applications

Field Vegetables
(cabbage, tomatoes,
peppers, eggplant, lettuce,
celery)

Apply 1 litre/acre in drench solution with fungicides
and pesticides at planting.

Cucurbits
(cucumber, squash,
pumpkin, melons)

Apply 1 litre/acre in drench solution with fungicides
and pesticides at planting.

Potatoes

Apply 1 litre/acre in drench solution with fungicides
and pesticides at planting.

Tobacco

Apply 1 litre/acre in drench solution with fungicides
and pesticides at planting.

Strawberries

Apply 1 litre/acre in drench solution with fungicides
and pesticides at planting.

Always read and follow label directions before application.
