

Komplete

0-22-15 + 0.3% Zn + 0.1% B + SylGro

Komplete is a proprietary product in our SylGro product line. This product has balanced formulations of available nutrition and SylGro technology to enhance crop performance in one jug. The SylGro technology is designed to mobilize and to activate the GABA shunt in plants. The shunt directly participates in controlling plant physiology and is key in controlling various physiological responses.

Features and Benefits to Applying Komplete

- Optimized plant nutrition and nutrient uptake characteristics
- Enhanced root development
- Increased tolerance of biotic and abiotic stresses
- Increased crop uniformity
- Improved crop quality

Advantages of Komplete

- Timely nutrition package for reproduction
- Enhances fungicide programs resulting in increased yield
- Compatible with most fungicides and pesticides
- Improved flower and fruit set
- Uniform fruit production
- Larger, darker foliage for improved photosynthetic activity
- Improved overall plant health
- Can be applied throughout reproductive stage
- Low salt formulation

Komplete Usage Recommendations – Foliar Applications

Alfalfa	Apply 1 litre/acre post-harvest when crop “greens” up to ensure uptake. Can be applied alone or tank mixed with suitable pesticide.
---------	---

Corn	Apply 1 litre/acre at the V5 to Tassel stages. Apply alone or with a fungicide for optimal results.
------	---

Small Fruits and Trees	Apply 2-3 litres/season beginning at flower initiation through fruit set. Best to apply ½ litre/acre every 10-14 days or 1 litre/acre 2-3 times a season. Apply alone or tank mixed with a pesticide or fungicide.
------------------------	--

Potatoes	Apply 1 litre/acre first at tuber initiation (first flower) and again 10-14 days later with a fungicide.
----------	--

Soybeans	Apply 1 litre/acre alone or tank mixed with a fungicide throughout flowering stage for optimal results.
----------	---

Field Vegetables	Apply 2-3 litres/season beginning at flower initiation through fruit set. Best to apply ½ litre/acre every 10-14 days or 1 litre/acre 2-3 times a season. Apply alone or tank mixed with a pesticide or fungicide.
------------------	--

Application Recommendation

Komplete is a pure solution and can be mixed with almost any fungicide and pesticide. However, a jar test is recommended before tank mixing to ensure compatibility.

Always read and follow label directions before application.
