

Absylute

15-3-6 + micros

RATE 1-2 Litres/Ac | **ANALYSIS** 15-3-6 + micro | **PROPERTIES** Liquid Fertilizer

Absylute is a SylGro foliar used to help plants with biotic and abiotic stresses. It contains a robust nutritional package including micros B, Cu, Mn, Mo and Zn, ideal for tank mix on any crop approaching stress period or reproductive stages. Absylute can be applied in regular spray programs or as corrective application to address plant deficiency.

Advantages of Absylute

- Ideal to help crops overcome stresses
- Easy to use on any crop!
- Increased crop uniformity
- Improved crop quality
- Increased plant metabolism
- Enhanced root development
- Can be applied in regular spray programs or as corrective application
- Enhances fungicide programs resulting in increased yield
- Improved flower and fruit set
- Uniform fruit production

Characteristics of Absylute

- Nutritional supplement containing an extensive micro package including B, Cu, Mn, Mo, Zn
- Optimized plant nutrition and nutrient uptake characteristics
- Timely nutrition package for reproduction
- Larger, darker foliage for improved photosynthetic activity
- Can be applied throughout reproductive stage
- Compatible with most fungicide, pesticides and herbicides
- Low salt formulation

Apply to all crops @ 1-2 L/Ac at or weeks prior to reproductive stage.
